## Felt Finger Puppets

### Supplies

- OESD Collection 12394 Felt Finger Puppets
- Medium weight tear-away stabilizer
- 2 rectangles of felt approximately 4" x 5"
- Temporary spray adhesive
- Scissors

### Instructions

1. Hoop one layer of medium weight tear-away stabilizer.
2. Attach hoop to your machine and send desired felt puppet design to your embroidery machine.
3. Stitch only the first color directly onto your stabilizer, this will stitch an outline of the puppet which is referred to on the thread chart as “placement stitch”.
4. Remove the hoop from the machine but do not remove the stabilizer from the hoop.
5. Lightly spray the wrong side of one felt rectangle with temporary spray adhesive.
6. Adhere this rectangle onto your stabilizer, being sure to completely cover the “placement stitch” by at least ¼" on all sides.
7. Return the hoop to the machine and continue stitching the design stopping before stitching the final color change, referred to on the thread chart as the “seam stitch”. **(Photo 01)**
8. Remove the hoop from the machine but do not remove the stabilizer from the hoop.
9. Carefully turn hoop over to the wrong side.
10. Lightly spray the wrong side of one felt rectangle with temporary spray adhesive.
11. Adhere this rectangle onto the backside of your stabilizer, being sure to completely cover the “placement stitch” by at least ¼" on all sides. **(Photo 02)**
12. Stitch the final color change.

**HINT:** To keep the seam stitch looking nice on the backside of the puppet, be sure to use the same thread in the bobbin as was used for the top thread for this color change.

13. Remove the hoop from the machine and the stabilizer from the hoop.
14. Gently tear-away the excess stabilizer from between the two layers of felt. **(Photo 03)**
15. Use scissors to cut away the excess felt by cutting ¼" outside of seam stitch. **(Photo 04)**
16. Enjoy your finger puppet!
